# EDITORIAL

It is my pleasure to present to you the tenth edition of my magazine to you.

The magazine has been quite popular among the students and teachers at Manav Sthali School, since its launch online.

The magazine presents news and reviews on latest Information Technology written by me and my friends. Our focus is all kinds of technology be it in computers, mobiles, games, cars. Everything Technical goes in here.

The different editions for magazines are available for download at [www.mvdittechbook.co.nr](http://www.mvdittechbook.co.nr) in a pdf format.

Suggestions are welcome for the improvement of the magazine.

A Quick review of EA Sports FIFA 08

Welcome to our segment of Futuristic Aircraftts

# IN THE LIMELIGHT

## The all new iPod Nano Chromatic

Vidit Bhargava

The All new iPod nano Chromatic has arrived. Starting with the design, it is inspired from the Microsoft Zune. Last year's iPod Nano 3G was given the name **"FAT"** by many critics but I felt it to be good. This time they placed the buttons along the screen and placed it vertically! That's what was done, and not to forget they also made the sides oval shaped. Even if they have remained the last year's iPod Nano in a vertical form, it still looks good. It's even slimmer than the last year and has got more capacity at a lower price.

Looking at its features its fully loaded with some great features like :

## A musical Genius

Say you're listening to a song you really like and want to hear other tracks that go great with it.

## Find your music faster

It's even easier to find the song you want to hear.

## Rock and roll over

Tilt or turn iPod nano on its side, and you'll listen, watch, and play in new ways.

## Shake your groove thing

Sometimes, we could all use a little unpredictability.

## Even your photos rock

Pull hundreds of photos from your pocket and share them wherever you go.

## World's biggest small screen

Watching movies, TV shows, and videos is big fun on iPod nano.

Siddharth Dwivedi

## GET READY FOR GOOGLE CHROME

GOOGLE CHROME set to hit the  
browsers list this month

# ASIMO'S DIARY

20<sup>th</sup> September 2008

Hubo and Actroid are back from their pilgrimage trip, so we went to McDonalds today. The people were astonished to see us eat food and talk to us; some also came to photos, autographs. We liked the food very much. I ate a Burger and French fries, while Hubo and Qrio had a Pizza McPuff, unfortunately Actroid couldn't have anything as he had a stomach ache.

# NFS UNDERCOVER

Now you must get behind the wheel and risk everything to infiltrate a ruthless international crime syndicate and take them down.

The man you're after is a maniac behind the wheel, and he's driving like his life depends on escape, which maybe it does. He's the one with all the answers you need, you will track him down. Needless to say, that fleet of police cruisers in your rearview mirror won't make things any easier. It will take all of your experience, and every ounce of skill, to outrun the law, take down the enemy, and unlock the truth that puts an end to this chase once and for all.

## Key features

### Go Deep Undercover

Race into an action-packed story of pursuit and betrayal. Take on jobs and compete in races to prove yourself as you infiltrate and take down an

international crime syndicate.

### Highway Battle

Fight off the cops and others as you take down your prey in high-speed, high stake multi-car chases.

New and vastly improved AI mechanics mean more aggressive and intelligent cops focused on taking you out fast and by any means necessary.

## CEO in the Lime light

Mudit Bhargava

This month it's **Eric Schmidt** the **CEO of Google**.

Eric Emerson Schmidt, Ph.D (b. 1955 in Washington, D.C.) is Chairman and CEO of Google Inc and a member of the Board of Directors of Apple Inc.

### Education

Dr. Schmidt obtained a bachelor of science degree in electrical engineering from Princeton University and an MS in 1979 and a PhD in 1982 in EECS from the University of California, Berkeley.

### Career

Schmidt was a member of the research staff at the Computer Science Lab at Xerox Palo Alto Research Center (PARC) and held positions at Bell Laboratories and Zilog. In 1983, Schmidt joined Sun Microsystems as software manager. At Sun he led the development of Java, Sun's platform-independent programming technology, and defined Sun's Internet software strategy. He later became chief technology officer and corporate executive officer.

Eric Emerson Schmidt, Ph.D (b. 1955 in Washington, D.C.) is Chairman and CEO of Google Inc and a member of the Board of Directors of Apple Inc. From 1997 to 2001, Schmidt was CEO of Novell

# GOOGLE CHROME

Vidit  
Bhargava

This month Google introduced its new web browser, CHROME this month. It is an open source browser. It was nice to see that in the ACID test it left all the browsers running on PCs behind and came as an ultimate winner scoring 78/100.

CHROME'S introduction has boosted some questions. Like; Is Open Source Programming the next big thing in computers?

Though in its Beta stages right now, It is still performing very well it is a good experience using GOOGLE CHROME.

I will give it ★★★★★/5 for a new and refreshing browser.

# Google Chro

# BEGALET - UNIVERSAL PERSONAL TRANSPORT

**Designed by:** Scarab Aviation Labs

**Description:** A car shaped Personal Aircraft

**Capacity:** It is a very small personal jet in which only one passenger can sit.

**Speed:** 60 km/h

**Engine maximum power rating:** 45 hp

Vidit Bhargava

Rating: ★★★★★

Every year EA Sports comes out with a new FIFA game promising for better graphics but they haven't lived up to their expectation. It has all been an OK performance since FIFA 07 where new graphics were introduced latest. The

*FIFA 09 promises a lot with its dynamic new graphics interface*

FIF

A 08 hadn't given much to be said a next gen graphic game it was good performs in the game play though

The game FIFA 09 Promises again and lives up to our expectations this time. It makes a point. The graphics prove that the standards of making sports games like FIFA Series have increased. Even the home screen is new and refreshing you feel it to be something good from the beginning.

Coming to the game play it is good, and the inclusion of collisions make it look like a real experience, the way in which AI comes from its trail is very challenging for the Users, as they get very little time to get back into the game. Being a hard core game I chose to start with professional mood, though it was very challenging and tough I didn't lose the game. It ended in a draw. So quite rightly the game is challenging and winning is not a child's play now. I victory today doesn't mean a victory every day.

Talking about the skill movements and new features, This game has ample of new Cameras, with Dual Stick Movements, while new effects like collisions have got the game to a higher level. The home screen has also got some new widgets! So you can manage

your offline and **online profile**, and your tournaments

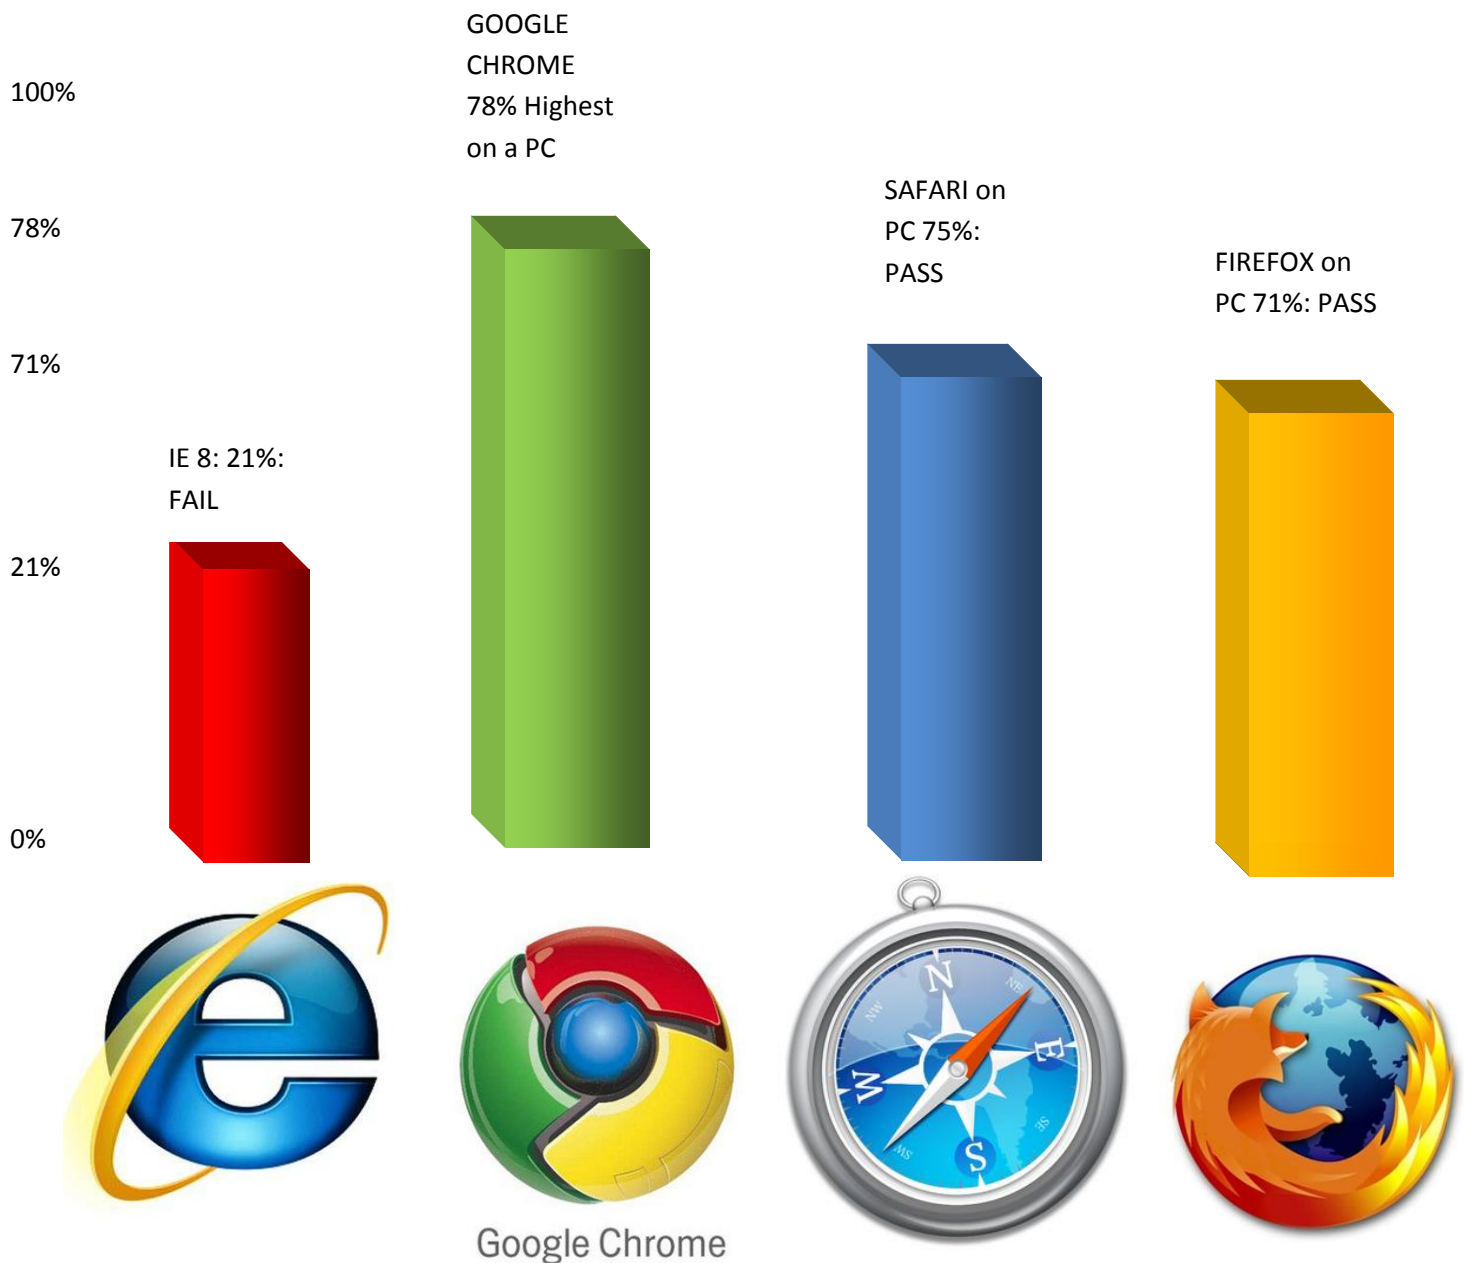

So I would give FIFA 09 a four out of five for an attempt that for the first time didn't go for vain.

# Is your web browser ACID TESTED?

Here is a look at a few common web browsers and their comparison on who is faster
