EDITORIAL

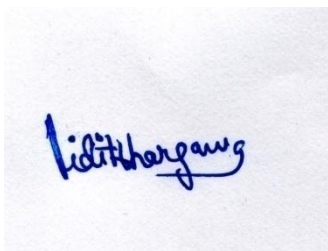

It is my pleasure to present to you the January edition of my magazine to you.

The magazine has been quite popular among the students and teachers at Manav Sthali School, since its launch online.

The magazine presents news and reviews on latest Information Technology written by me and my friends. Our focus is all kinds of technology be it in computers, mobiles, games, cars. Everything Technical goes in here.

The different editions for magazines are available for download at www.mvdittechbook.co.nr in a pdf format.

Suggestions are welcome for the improvement of the magazine.

IN THE LIMELIGHT

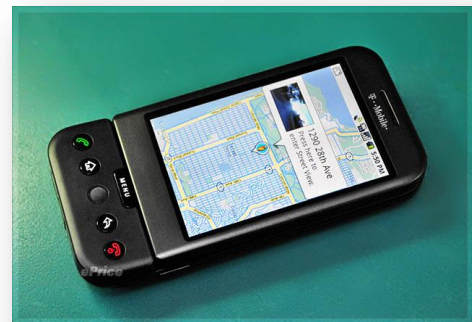

HTC DREAM COMES TO INDIA

Finally, a competitor to the Apple iPhone 3G has arrived in the Indian market. The much awaited HTC DREAM G1 will be launched in India this month with the Google Android Operating System. It's Actually not the phone which is being eagerly awaited but it's Operating System. HTC Dream got its name G1 just because of the android software included in it. The

Google Android, an open source Operating System involving touch controls and superior file management and editing is the only one in its kind.

After being an iPhone user for a long time I have now eventually realised that it's not just a phone. The App Store Provides you with apps that actually can turn your phone into a gaming console, digital camera, pocket computer involving file editing or even a radio. That's why it becomes more important for the 'Android' to not only offer these facilities but also provide something superior and original to the users. The inbuilt spreadsheet app, or the maps from Google is an innovative but the google foot search is just an awesome app to be added

to a phone. But All the spreadsheets, Gmail, Word, etc... can only be accessed only through internet which destroys the its ability to access files on the move easily as an inbuilt feature.

The Sole Dependency of the software on open source software is an advantage aswell as a disadvantage also. It is a phone by the people and for the people. This makes the phone solely dependent on our made

utilities. That is a big advantage as we can modify the phone as we want but only a little availability of inbuilt basic software programmes disappoints us as then we need to search for even basic apps on the android market.

Although we face a little bit of disappointments with

the phone but we also are cherised with the quality of hardware and the innovative ideas involved in the making of the phone which took more than 2 years to complete. The inclusion of solid keyboard beneath the screen is a very good idea as many of the other phones earlier have to copy the iPhone style of keyboard. The innovative touch pattern lock is just a description of how great things with great utility are made. The phone is priced at 24,900 at a popular e-store in India which is a good deal to buy the phone.

Tim Cook: Interim Apple CEO

After Apple Inc. CEO Steve Jobs declared that he was suffering a 'hormone imbalance', Apple was looking to declare a new CEO for some time. Finally Apple has declared Tim Cook as an interim CEO till June 2009 when Steve jobs comes back. This is the second time Cook has become the CEO of Apple Inc. Earlier he was the CEO of apple in 2004 in the absence of Steve Jobs. Tim also is the COO of Apple Inc. and is behind many of their projects.

Ex Fighter Pilot From USA Lands a Plane in to The River

Ex – Fighter Pilot C. Sullenburger on Friday landed a US Airways Airbus A380 in river Hudson. The plane had reportedly been hit by a bird and then the engines stopped working and the plane had to crash land in the river. All passengers were safe after this landing.

Actually, The Fighter pilots are given expert training to land an aircraft in any circumstances and this was one such case.

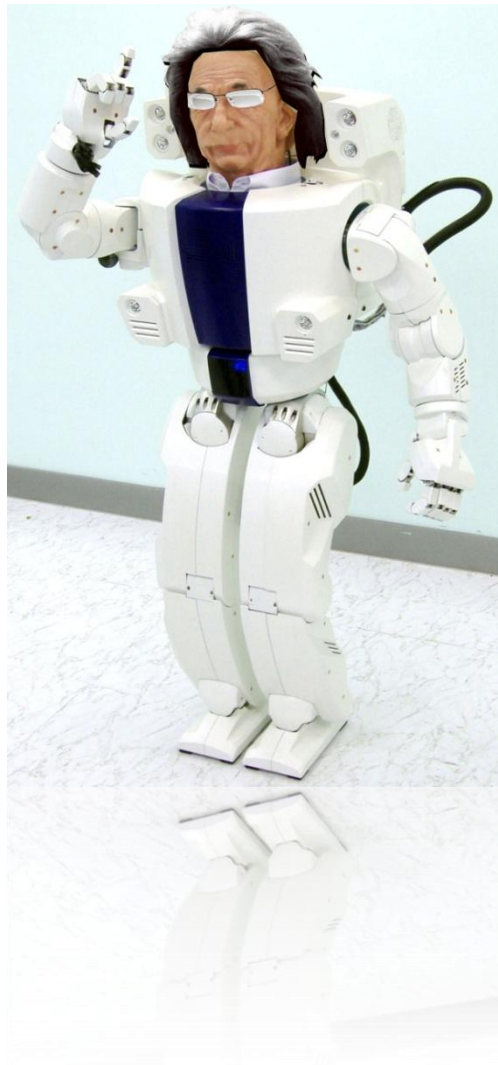

The plane was flying from LaGuardia (USA) To Totenberg (USA).

ASIMO'S DIARY

1st January 2009

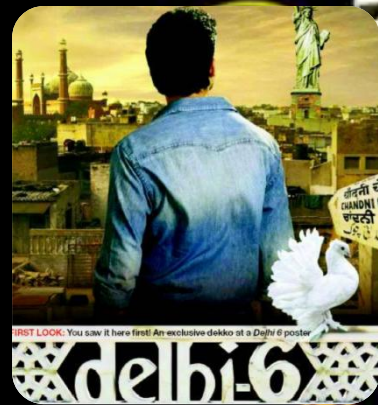

We've now got a few New Year gifts also. The best one is the new cap which I have got. REEM B has got a new shirt and the funniest is of HUBO who has got a new hair cut.

Readers Playlist

15. Tujh Mein Rab Dikhta Hai – Rab Ne Bana Di Jodi

A portrait of Tim Cook, the CEO of Apple, smiling. He is wearing a grey button-down shirt. The background is white.

TIM COOK

Timothy D. Cook Born – 1960 is Apple's Acting Chief Executive Officer till June 2009. We all know this man now after he is apple's new CEO for a while but let's know a little more about him.

Timothy D. Cook is Apple's chief operating officer .Cook is responsible for all of the company's worldwide sales and operations, including end-to-end management of Apple's supply chain, sales activities, and service and support in all markets and countries. He also heads Apple's Macintosh division and plays a key role in the continued development of strategic reseller and supplier relationships, ensuring flexibility in response to an increasingly demanding marketplace.

Before joining Apple, Cook was vice president of Corporate Materials for Compaq and was responsible for procuring and managing Compaq's entire product inventory. Previous to his work at Compaq, Cook was the chief operating officer of the Reseller Division at Intelligent Electronics.

Cook also spent 12 years with IBM, most recently as director of North American Fulfillment where he led manufacturing and distribution functions for IBM's Personal Computer Company in North and Latin America.

Cook earned an M.B.A. from Duke University, where he was a Fuqua Scholar, and a Bachelor of Science degree in Industrial Engineering from Auburn University.

CD – DRIVE: Sony DVD + RW
HDD: Seagate 160 GB SATA HDD
HP 17" Monitor (TFT)
Microsoft Keyboard
Microsoft Mouse
Speakers: 2.1 CREATIVE SBS

PRICE : 24,000

Processor : Processor: Intel Core 2 Duo 2.44 GHz
RAM: 1 GB
Video Card: INTEL GMA 915
CD – DRIVE: Sony DVD – ROM
HDD: Seagate 120 GB SATA HDD
LG 15" Monitor (TFT)
iBall Keyboard,
iBall Mouse
Speakers: Creative Inspire T10

Rs. 18,000

*Indicative Prices Only.

Cadillac Beast

Behold 'The Beast': Barack Obama's all-new Cadillac presidential limousine.

Although the car is officially called Cadillac One, it takes its 'Beast' nickname from the numerous safety modifications required to protect Obama – and its 8mpg fuel consumption.

These extreme modifications include:

- ✓ Armour-plated doors that are eight inches thick - each weighing the same as a cabin door on a Boeing 757 airliner.
- ✓ The boot contains an independent oxygen supply and advanced fire-fighting system.
- ✓ Defense systems include pump-action shotguns, night-vision cameras and tear-gas cannons. Supplies of the President's blood will also be kept on board in case he needs emergency medical treatment.
- ✓ The petrol tank is armor-plated, while also being filled with specially designed foam to prevent it from exploding if the armor is penetrated.
- ✓ Tyres on the limousine are Kevlar-reinforced, puncture- and shred-resistant, with special steel rims that allow the car to continue driving even if the tyre is missing.
- ✓ The bodywork is made up of a combination of dual-hardness steel, aluminum, titanium and ceramic material to help break up projectiles aimed at the car.
